

Memo from
JOSHUA LEDERBERG

To: Ed

MAY 21 1974

re Don Knuth

again

I have been reading with renewed admiration the 3 vols. to date of the "Art of Computer Programming".

What do you think of the merit and the feasibility of drawing him more closely into consultation and planning of Dendral. He is, evidently, an accomplished graph theorist and esp. as to the computer representation and manipulation of graphs.

Josh.
